PROFESSIONAL SUMMARY

Agentic AI Engineer with hands-on experience building multi-step AI workflows, agentic architectures, and enterprise CRM/API integrations. Shipped multi-agent systems, Python ETL pipelines, Salesforce CRM workflows, and MCP/OAuth2 integrations that improved process reliability and adoption.

SKILLS

Python, LLM APIs, MCP, API Integrations, OAuth2, Salesforce CRM, SQL, ETL, Tableau, BI Tools, Data Platforms, Data Governance

WORK EXPERIENCE

NuOnc Remote
AI Engineer - Multimodal Diet App 01/2026 - 02/2026

- Built and deployed a multi-agent chatbot on Vertex AI using Google ADK and LLM APIs, orchestrating FAQ support, scheduling flows, and email workflow routing for a healthcare-adjacent diet app.
- Integrated Gemini's multimodal API to analyze meal photos, extract nutrition data, and classify dietary compliance from user-uploaded images.
- Shipped the product to roughly 200 beta users, lifting customer retention by 20%, and used session-level behavioral data to steer roadmap prioritization and next-release decisions.
- Designed a session-level data pipeline to structure user responses and behavioral signals for roadmap prioritization and release planning.

Ant Group Sunnyvale, CA
Risk Management Analyst 07/2025 - 12/2025

- Managed client-facing case communications through Salesforce, responding to applicant inquiries, explaining case status and rejection reasons, and coordinating with support on billing and compliance issues.
- Owned daily onboarding risk operations for a fintech wallet product, extracting alert batches via Structured Query Language (SQL) and reviewing customer cases to clear, escalate, or enforce actions.
- Drove implementation of granular rejection transparency logic with Product, reducing application rework from 50% to 30% and weekly support escalations from 300+ to 200.

Boston College Chestnut Hill, MA
Research Assistant - Automated Daily Inflation Data Pipeline 12/2024 - 05/2025

- Engineered an automated ETL pipeline for high-frequency time-series data, extracting daily pricing from major retailers to support a real-time inflation nowcasting model.
- Designed and maintained source-specific extraction workflows, handling ingestion logic, data cleaning, and normalization across 6 major grocery platforms with distinct formats.
- Developed Regex-based transformation scripts to standardize heterogeneous product units and perform SKU deduplication on 60,000+ records for modeling.

China Construction Bank Ningbo, China
Credit and Risk Analyst Intern 07/2023 - 09/2023

- Extracted and organized borrower datasets using SQL to deliver credit-risk metrics for 3 senior analysts, reducing turnaround time on daily credit reviews.
- Analyzed probability outputs from credit-risk models across an active loan portfolio, flagging 15+ high-risk accounts by evaluating repayment history, delinquency ratios, and DTI trends.

SELECTED PROJECTS

AI Networking & Outreach Automation Pipeline | Python, MCP, OAuth2, REST APIs 03/2026

- Architected an end-to-end Python networking pipeline that used Model Context Protocol (MCP) standards to parse 100+ job descriptions daily and identify relevant hiring managers and alumni.
- Engineered a discovery API with a custom LLM router that toggled between REST integrations such as Tavily Search and Vertex AI to cut manual prospect research time by 95%.
- Interfaced with the Gmail API via OAuth2 to batch-schedule targeted outreach and automatically attach bespoke PDF resumes, scaling output to 300+ personalized drafts per week.

EDUCATION

Boston College, Morrissey College of Arts & Sciences Chestnut Hill, MA
Bachelor of Arts in Economics, Minor in Finance 05/2025

GPA: 3.6/4.0 | Coursework: Econometrics, Machine Learning for Economics, Math for Data Analysis, Linear Algebra, Financial Econometrics
